JURASSIC LAKE

Probably the best wild Rainbow Trout fishing in the world!

JURASSIC Lake is a place where you can experience the sort of fishing that only your forefathers could have envisaged. We have yet to come across anyone who has not been literally bowled over by the size or the quantity of the fish combined with the sheer wildness of this location.

It is in an area almost totally devoid of human contact, with the exception of an impossibly remote farmhouse. A place so inaccessible that only the foolhardy would ever consider visiting, least of all running, a remote fishing camp here. It is however precisely this environment that has allowed it to develop into what we consider to be

probably the world's most prolific wild Rainbow Trout fishery.

Within the surrounding, precipitous rocky cliffs that border the lake, cave art from a distant era provides inspiration for its name. But if the art is Jurassic in nature it is the fish that draw the more direct comparison on account of their gargantuan proportions. Averaging in the region of 10 lbs these totally wild and unbelievably powerful fish are enough to make regular trout fishing tackle redundant. Rods with significant backbone and reels that contain a genuine hundred yards of backing are required to tame these leviathans.

The Area

The lake itself is virtually cut off from the outside world with only a small nomadic estancia outpost sharing the shores of the lake. Surprisingly, a herd of cows graze in localized areas of greenery although for the most part the land and backdrop is a harsh and unforgiving rock strewn desert. The lake itself is fed by one significant tributary although this reduces to a trickle during the summer months. The water, however, is of crystalline clarity allowing one on clear windless days to see schools of fish cruising far offshore whilst at the same time allowing the discerning angler to stalk individual fish.

The Camp

Facilities at Jurassic Lake are very basic; simple but sufficient for those willing to experience this unique location. Anglers are accommodated in tents equipped with beds and wooden flooring. Sheets with duvets and blankets are provided. Meals are taken centrally and cooked in a larger central dining tent with typical Argentinean dishes being served and lunches being cooked on the lakeside.

Loop Tackle Service

A Loop sponsored and run camp, Jurassic Lake is used as a field-testing station for the latest range of Loop rods, lines and reels. Guests are invited to trial or borrow the gear during their stay.

Wise Men Tips

Take full advantage of your time in Patagonia and extend your stay with packages to fish for Steelhead on the Santa Cruz river, Sea Trout on the Rio Gallegos or Rio Grande or Trout in Chile. Further details available on request.

Best Times to go

Trips to Jurassic Lake are available as either independent weeks or as add on programmes to combine with fishing for Sea Trout at both Las Buitreras lodge on the Rio Gallegos or Steelhead fishing on the Santa Cruz.
